

Packet cover

SOURCE PAGE 01

Fictional packet for checking PDF page selection.

Six source pages. Keep only the pages you need.

No real customer, invoice or contract data.

Fictional source. A saved reference, not a live account result.

filenest-pages.pages.dev/en/tools/pdf-batch-converter

Internal notes

SOURCE PAGE 02

This internal page should not be in the selected output.

Use the original page numbers, not a merged file.

Selection for this example: pages 3-5.

Fictional source. A saved reference, not a live account result.

filenest-pages.pages.dev/en/tools/pdf-batch-converter

Delivery checklist

SOURCE PAGE 03

Check all three items before sharing the packet.

- 01 Confirm the selected page range.
- 02 Check the number of output files.
- 03 Open the first and last output pages.

Fictional source. A saved reference, not a live account result.

filenest-pages.pages.dev/en/tools/pdf-batch-converter

Item summary

SOURCE PAGE 04

Item A: display stand - quantity 2

Item B: storage box - quantity 4

Item C: label sheet - quantity 1

Fictional source. A saved reference, not a live account result.

filenest-pages.pages.dev/en/tools/pdf-batch-converter

Handover notes

SOURCE PAGE 05

Keep these notes together with the item summary.

Original pages 3, 4 and 5 should stay in that order.

The printed SOURCE PAGE label is a cross-check.

Fictional source. A saved reference, not a live account result.

filenest-pages.pages.dev/en/tools/pdf-batch-converter

Reference appendix

SOURCE PAGE 06

This appendix should not appear in the example output.

The original source remains a six-page document.

This fixture does not demonstrate OCR or PDF-to-Word.

Fictional source. A saved reference, not a live account result.
